

BOTTLE WASHING AND STORAGE

EXTERNAL BOTTLE WASHER

Bottles which have been stored full require washing prior to labelling. This is particularly important for champagne bottles which may have been stored for some time and for apple juice bottles which can suffer from external mould growth. Profiled nylon brushes rotate in a water trough and scrub four bottles at a time. Stainless steel construction.

Dimensions (W x D x H mm)	Voltage (V)	Stockcode
940 x 480 x 1070	400	98100

EXTERNAL BOTTLE WIPER/DRIER

Rubber squeegee housing which wipes bottle dry after washing and prior to labelling. The housing can be supplied either with a mounting bracket or mounted on a 50 litre plastic trough on a trolley.

	Stockcode
Cleaning head only (with mounting bracket)	98101
Cleaning head with trolley-mounted bracket trough	98102

STILLAGES FOR BOTTLE STORAGE

Rigid Stillages

Galvanised steel weldmesh with a solid base, designed to hold up to 600 bottles of 750ml capacity; these cages can be stacked as high as your fork lift will permit, reducing demand on floor space. Half of one side hinged for easy access.

Dimensions (W x D x H mm)	Weight (kg)	Stockcode
1220 x 840 x 800	54	97605

Collapsible Stillages

Collapsible stillages are available in sizes to accommodate most conventional types of wine bottle. Can be stacked when full and fold flat for storage and transport. Please enquire for more information.
