

Labelling Machines

PERFECT LABEL PRESENTATION

We've seen some amazing examples of drink packaging which perfectly portray the unique qualities of our customers' brands. We've also seen examples of how the overall effect is ruined by creased, bubbled or crooked labels but what conclusions do potential customers make about the brand as a result?

This is where we can help. Our range of labelling machines can help you to enhance the appearance of your products. Labels will be applied:

- Consistently
- Evenly
- Quickly

SET UP FOR YOU

Successful label application is not only dependent on the labelling machine itself but on it being correctly set up with your labels and for your bottles.

We make sure that the labelling machine will work perfectly for you on day one. Your labels will need to be printed according to the printing requirements of the machine – we can discuss these requirements direct with your printer if it helps. When we receive your bottle samples and reels of your labels, our in-house engineers set up the labelling machine apply your labels to your bottles (or containers). Our automatic labelling machines are installed and commissioned at your production facility by our engineers, either in-line or as stand-alone units, and we give you and your personnel full training in the use of the machine.

VL/4 LABEL APPLICATOR

A very simple hand operated label applicator for applying single labels to cylindrical bottles. Ensures label application at speeds that are difficult to achieve by hand.

TECHNICAL INFORMATION

- Hand operated
 - Single label
-

VL/1 LABELLING MACHINE

A reliable, easy to operate labelling machine. Labels are applied under a pressure of 14kg to reduce the risk of bubbling and wrinkles caused by uneven bottle surfaces. Optional accessories available including hot foil lot marker and the ability to label square containers.

TECHNICAL INFORMATION

- Semi-automatic, up to 600 bph, 1ph 13A
- Single label or front & back

S1/ZETA LINEAR

Our most popular machine which smoothly applies single labels, or front and back labels in one pass, and neck labels. Designed for use in-line or as a stand-alone unit. Labelling stations are operated through stepper motors to ensure maximum precision of label application.

TECHNICAL INFORMATION

- Automatic, up to 1,000 bph, 1ph/3ph
- Single label or front & back; neck

S1/Z AVV LINEAR

A cost-effective machine which applies single labels. Designed for use in-line or as a stand-alone unit. Labelling station is operated through stepper motors to ensure maximum precision labelling. Also includes belt label smoothing. Change parts for additional bottle sizes available.

TECHNICAL INFORMATION

- Automatic, up to 2,500 bph, 1ph/3ph
- Single label

S1/L LINEAR

A machine which can apply either single labels or front and back labels in one pass, and neck labels. Designed for use in-line or as a stand-alone unit. The drive rollers smooth the label after application. Stepper motors ensure maximum precision labelling. Change parts available.

TECHNICAL INFORMATION

- Automatic, up to 1,500 bph, 1ph/3ph
- Single label or front & back; neck

ROTARY MACHINES

A range of rotary labelling machines are available with capacities up to 12,000 bottles per hour. Designed for use in-line or as stand-alone units. Includes a central carousel with up to 12 bottle platforms, variable speed drive, stepper motors, and steel and nylon gear drive for quiet operation.

TECHNICAL INFORMATION

- Automatic, up to 12,000 bph, 3ph
- Single label or front & back; neck; tax strip

Optional accessories for automatic machines	S1 Zeta	S1/AVV	S1/L	Rotary
Hot foil printer	Y	Y	Y	Y
Neck label station or tax strip	Y (neck only*)		Y	Y
Sensors for transparent labels	Y	Y	Y	Y
Square bottle accessory	Y		Y	Y
Capsule distributor and shrink head for PVC	Y		Y	Y
Capsule spinner for metallic capsules	Y		Y	Y
Touch screen control			Y	Y
[* up to champagne wrap-around]				

FOR CHAMPAGNE BOTTLES

We also supply rotary labelling machines for Champagne bottles, designed for use in-line or as a stand-alone unit. They include a single head capsule distributor and double pneumatic head for applying Champagne foils (with or without medal), touch screen control and program memory.

TECHNICAL INFORMATION

- Automatic, up to 1,200 bph, 3ph
- Single label or front & back; neck; tax strip

If you require a full bottling line, please call our sales team on 01404 892100 or see our Automatic Bottling Line brochure

“I chose Vigo as they were competitively priced and helpful, both on providing the information I needed and being honest. The labeller has performed exactly as I expected. Technical advice has also been first class. The labeller is easy to use and calibrate with both our bottle sizes. It applies the labels evenly every time! We are a small independent business and have not always been treated with the customer service we feel is required when buying brewing and packaging machinery. Our experience with Vigo has been excellent, which was refreshing. We take our product and packaging seriously and look forward to working with Vigo in the future.”

Tom Maule, The Maule Brewing Co.

Finishing touches

You're passionate about your products. Your dedication is demonstrated through the time and resources you have invested. Product quality is paramount.

How do you entice the consumer to reach for your product when it's on a shelf amongst the competition and they can't sample it?

This is where finishing touches and aesthetics are really important. Your packaged product has to sell itself,

so appearances are everything: the bottle, closure, shrink capsule/foil, and the design of the label are your marketing tools. So it's important to show them at their best.

CAREFULLY CHOSEN MACHINES

Quality, reliability, flexibility and ease of use are key features of the labelling machines in our range. The machines need to be straightforward to operate, consistent in label application, and as flexible as possible in terms of accommodating different bottles/containers and label sizes. We carefully chose manufacturers on this basis and our range suits all scales of production from a small throughput to 12,000

bottles per hour. Our automatic machines are supplied by STS who have over 20 years' expertise in designing and manufacturing labelling machines, and are renowned for producing machines which can label virtually any type of container.

FULLY SUPPORTED

We offer a comprehensive warranty, supported by our team of engineers. Should you need any help, extra accessories, or a training recap, our technical support engineers are available to talk to or for call-out.

**We look forward
to hearing from
you about your
labelling requirements.**

**Please call us on 01404 892100 to
discuss your project further.**

**If you prefer to talk face-to-face we
would be pleased to visit you or you
are welcome to visit us. To arrange a
visit please call 01404 892100.**
