

**Keg Cleaning
& Filling Solutions**

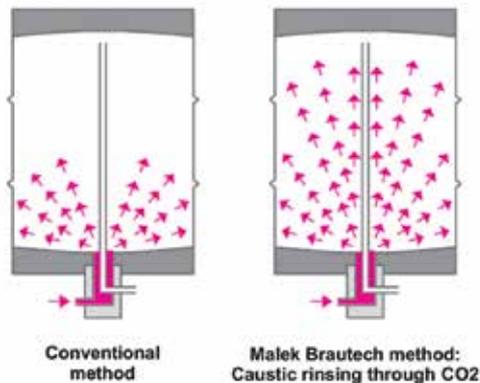

Equipping the Nation's Drink Producers

THE RANGE

Malek Brautech's portfolio ranges from semi-automatic and fully automatic machines, through to fully automatic lines with multiple cleaning and filling heads.

As Malek Brautech's UK agents, we ensure you receive a comprehensive service, from choosing the right solution for you, installing and commissioning in your production facility, through to full technical back up. The backup we offer ensures minimal production downtime, easily obtainable spare parts (if required) and telephone support from our qualified mechanical and electrical engineers.

CLEANER KEGS

PATENTED

- High flow rate
- High pressure cleaning
- Intensive cleaning

MAKING THE RIGHT CHOICE

After consultation with our multi-skilled engineers and Malek Brautech, we provide:

- A comprehensive quotation outlining our recommended solution/s
 - Full machine specifications
 - Clear pricing of equipment, conveyoring, and any bespoke work required
 - Optional extras, where necessary
 - For projects with higher levels of automation we survey your site, advise, and provide CAD modelling to guarantee smooth project delivery
 - Experienced (Vigo) engineers to install and commission your keging equipment on site and provide training to you and your production operatives
 - Full technical backup and support (by phone or call-out) to achieve the longest possible service life of all equipment installed by us
- Malek Brautech's high level of commitment to quality and innovation is clearly demonstrated in the design, manufacture, and smooth operation of their cleaning and filling machines. We rate their machines highly for the following specific characteristics:
- Increased sterility & minimal oxygen pickup for optimum product shelf life
 - Easy operation and low maintenance
 - Patented cleaning process for cleaner kegs (see image above)
 - Patented cold filling by temperature monitoring
 - Patented condensate monitoring (optional)
 - Adjustable cleaning programs/times
 - Sterilising options including steam/sterilant rinse recirculation
 - Change parts to suit different keg fittings
 - Quick changeover for different keg sizes
 - Touchscreen for ease of operation
 - Robust build quality for longevity

You can see the full machine specifications at www.vigold.com. There is no substitute, however, for gaining specific information on the issues that are important to you, so do call us on 01404 892100.

MONOCLEAN

The Monoclean semi-automatic keg cleaner is the perfect solution for small scale breweries and cider producers with a low keg requirement. Adaptive programs for different keg sizes mean the machine cleans reliably and cost-effectively. The integrated detergent tank is suitable for the use of caustic and acid agents, and has electrical heating. An additional, manual filling head can be used to fill at up to 20 kegs per hour.

TECHNICAL INFORMATION

- Cleaner
- 15 kegs/hour

TWIN 2000

The TWIN 2000 keg cleaning machine is a semi-automatic, compact machine with cleaning head and integrated detergent tank for caustic or acid agents. This machine is easy to use and offers high levels of flexibility via an adjustable stopper and interchangeable format parts. In order to fill, an additional manual filling head can be used to fill at up to 20 kegs per hour; or a semi-automatic filling machine is also available.

TECHNICAL INFORMATION

- Cleaner
- 30 kegs/hour

TWIN II 1R-F

The TWIN II 1R-F is a semi-automatic machine for cleaning and filling kegs. The system has an integrated detergent tank for caustic or acid agents. For ergonomic handling of filled kegs, the machine is fitted with rollers at the fill station as well as at the keg slide. The machine can be used to fill different keg sizes and is fitted with an adjustable stopper for greater flexibility. Change parts can be used and fitted in a few minutes for different keg fittings, including Key kegs. The fill height is determined by a temperature probe (patented) or with the option of a flow meter.

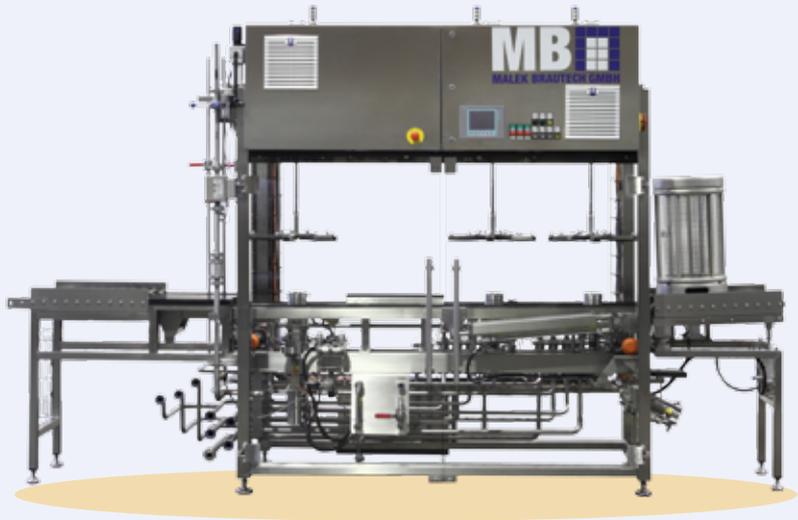

TWIN II with double head cleaner also available (2R-F)

TECHNICAL INFORMATION

- Cleaner (single head)
- Filler (single head)
- 30 kegs/hour

KEG-SET-NG

The fully automatic KEG-SET-NG cleaning and filling machine ensures the reliable cleaning, sterilisation and filling of kegs. Cleaning is achieved with one or two detergents within one cycle, depending on the variant. The system can be adapted to suit different cleaning and filling regimes, and there is an option to fill Key kegs. An additional cleaning module can be supplied at a later date to cost-effectively increase the system's capacity to 60 kegs per hour.

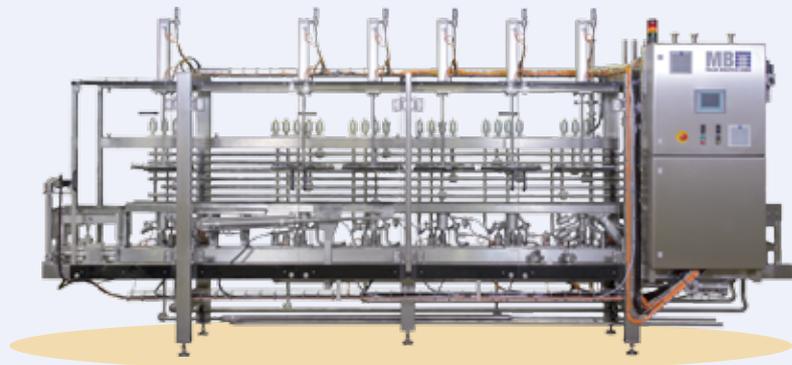

TECHNICAL INFORMATION

- Cleaner (2 head)
- Sterilising station
- Filler (1 head)
- 35 kegs/hour at 50L

VARIOMASTER

The fully automatic VARIOMASTER cleaning and filling machine is a linear module keg handling system. Its capacity ranges from 60 to 600 kegs per hour as a single or double variant, with various options available depending on requirements. Sturdy construction, low maintenance, good accessibility, and safe and efficient use of cleaning agents are key features of this system. The modular layout of multiple lines operated in parallel provide easy expansion when capacity requirements increase.

TECHNICAL INFORMATION

- Cleaner
- Steriliser
- Filler
- 60 to 600 kegs/hour at 50L

With us you'll notice the difference.

“ We chose to use Vigo for this project as they always offer an excellent service, listen carefully to our requirements, and are competitive. We have been delighted with the performance of the kegging line, and how easy it is to operate.” David Sheppy, Sheppy's Cider, Somerset

We work closely with you to establish your specific kegging requirements. We take budget, space, existing equipment, and services all into account and this enables us to offer a comprehensive service.

UNIQUE

Your product is unique and specially crafted. It has its own personality which your customers count on. We want to keep it that way. For this reason we carefully source equipment which treats your product with the utmost respect, retaining its quality and unique identity.

REPUTABLE

For over 30 years we have been supplying producers with the equipment they need to produce drinks they are passionate about. We offer quality, service and support.

Our approach is very collaborative, and one size definitely doesn't fit all. So we ask you to tell us what you wish to achieve and work closely with you and our team of in-house engineers so that we can find the best possible solution to your specific production needs.

CAREFULLY CHOSEN

Equipment isn't the only thing we choose carefully. We also have to make an informed choice about working with the supplier.

Our relationship with the supplier is critical. We spend time building relationships with our suppliers to ensure that we can give you a consistent level of high service.

We chose Malek Brautech keg systems not only because they are a leading keg equipment manufacturer, but because they met our criteria for expertise, commitment, and quality:

- They have 67 years of expertise designing & manufacturing standard & bespoke keg systems
- They are committed to optimum cleaning & hygienic, oxygen deficient filling of kegs
- Their innovation is demonstrated through patents and continual product development
- Their machines are made in Germany using quality materials & up-to-date production methods
- It's an owner-run company now in its 2nd generation with committed, long-serving employees
- Their Clients include Diageo Group/Guinness Brewery (Dublin), Efes Group & König Brewery

We look forward to hearing from you about your specific kegging requirements.

Please call us on 01404 892100 and ask us about kegging machines.

If you prefer to talk face-to-face we would be pleased to visit you or you are welcome to visit us. To arrange a visit please call 01404 892100.
