

## **Product Specification**

### **VinoGel® CF**

#### **Description:**

Liquid gelatin isinglass derivative for the treatment of young wine.

Composition:                                           gelatin, isinglass, citric acid, SO<sub>2</sub>

#### **Analysis:**

appearance:                                           yellowish, opalescent liquid

smell:                                                   slightly pungent SO<sub>2</sub> smell

density:                                               1.06 – 1.07 g/cm<sup>3</sup>

solid matter content:                           18 – 20 %

pH-value:                                             3.2 – 3.5

SO<sub>2</sub>-content:                                       < 2500 mg/L

#### **Microbiology:**

total viable count:                              < 10<sup>3</sup> cfu / mL

yeasts / moulds:                                < 10<sup>2</sup> cfu / mL

acid-tolerant bacteria:                        < 10<sup>3</sup> cfu / mL

coliforms:                                         negative / mL
